

Y10 Topic: SPR1 2.1 Micronutrients : Vitamins and Minerals including commodity group fruits and vegetables				Duration: 22 lessons	Composite: unit and test
Key vocabulary: julienne, dice, shape, pipe, blend and juice Fat soluble vitamins (A&D) Water soluble vitamins (C and B group, E and K) Source Function Excess Deficiency	Core knowledge Components <ul style="list-style-type: none"> I can discuss the nutritional benefits of fruit and vegetables. I can identify which vitamins are in which fruit and vegetables. What do the vitamins do in the body? E,g vitamin C, A an B group What do minerals do in the body? E.g. Iron or calcium. I know the difference between a vitamin and a mineral. What is the role of fat soluble Vitamin A and D in the body What is the role of water soluble Vitamin C, B group, E and K. I can explain the source and function of vitamins and minerals in certain vegetables (at least 3) I can confidently use knife skills to prepare fruits and vegetable Name at least 3 deficiency diseases caused by not getting enough vitamins and minerals Name problems caused by eating too much (an excess), of these vitamins and minerals. 			Powerful knowledge components crucial to commit to long term memory <ul style="list-style-type: none"> Knife skills: <i>julienne, dice, shape, pipe, blend and juice using fruits and vegetables</i> Recall all the fat and water soluble vitamins , with examples of source, excess and deficiency. To cook and prepare vitamin and mineral rich foods, so when meal planning I have an awareness of nutritional content and balance. To link certain fruits and vegetables to particular vitamins and minerals e.g. Carrots are high in vitamin A, Oranges are high in Vitamin C. 	Links to previous and future topics All practical sessions; as students use a variety of foods from all groups Macronutrients and micronutrients occur in ALL future modules as they are the foundation for all GCSE topics; function, source, excess and deficiency

SEND:					

- **Cultural capital:** career links, use of relevant news articles, vitamins and minerals in the diet and their roles in bodily function. Cooking a repertoire of healthy balanced meals, treats and snacks that contribute to a well-balanced diet. **Understanding different needs and dietary restrictions related to a diet that has an excess or a deficiency in one or several of these vitamins and minerals (links to health and wellbeing and a healthy mind)**
- **Knowledge skills and confidence:** building on practical cookery skills using fruits and vegetables and how to help a fussy eater maintain a balance and understanding their properties
- **Key vocabulary :** introduced at the start of the topic and in each specific lesson, followed with THINK HARD questioning.
- **Repetition:** knowledge based questions throughout the lesson, and a question at the start of each lesson about the previous lesson/topic with links
- **Technology:** bbc news article on website archive, CLEAPPS.org task, foodfactoflife.co.uk , task based worksheets using foodfactoflife.org.uk, video resource 'Mrs G cookery videos' (you tube).

Y10 Topic: SPR2 2.2 Energy – BMR, PAL, EAR.		Duration: 4 lessons		Composite: Unit and test	
Key vocabulary:	Core knowledge Components			Powerful knowledge components crucial to commit to long term memory	Links to previous and future topics
Basal metabolic rate Physical activity level	<ul style="list-style-type: none"> • Why do we need energy for our bodies to function? • Can you list all the energy-requiring functions of the body? • Can you identify which foods provide the most energy? • I can explain the following terms: Basal metabolic rate (BMR), Physical activity level (PAL) and estimated average requirement (EAR) • I can recall the number of calories a person needs • I can plan, prepare and make foods that are balanced in energy for the right age group based on that person's level of activity to suit their energy needs. 			<ul style="list-style-type: none"> • BMR, PAL and EAR – how these affect how much energy a person needs • Foods that are high in energy • The effects of a diet that isn't balanced and too high in energy rich foods 	All practical sessions; as students use a variety of foods from all groups Eatwell and Government guidelines 2.3
